

# HeartSave 7

THE NEXT GENERATION  
NETWORKED DEFIBRILLATOR

### HeartSave 7 - The networked defibrillator

The new AED of the HeartSave - Series supports lay users in emergency situations with sudden cardiac arrest.

Through the simple connection to myPrimedec Control, the status of the HeartSave 7 can be continuously reviewed. This ensures that the HeartSave 7 is ready for use, especially in public places.<sup>1</sup>

### Simple and reliable

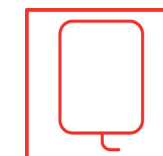

For less trained first aiders, the operation of an AED can be very complex. The HeartSave 7 supports the first aider through clear visual and simple acoustic instructions and an automated process of resuscitation measures.

This promotes user awareness and guarantees reliable use of the HeartSave 7.

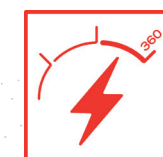

### NETWORKED DEFIBRILLATOR

Depending on the model, the HeartSave 7 can be connected to the internet via Wifi or LTE. This connectivity ensures data transmission to myPrimedec Control and the associated operational readiness of the HeartSave 7.<sup>1</sup>

### UNIVERSAL SAVEPADS

The SavePads Duo can be used for adults and children.

### EFFECTIVE SHOCK DELIVERY

Depending on need, up to 360 J can be delivered for more effective treatment.

### IP55 STANDARD

Can also be used in challenging environmental conditions.

### MADE IN GERMANY

Developed and produced in Germany.

### ADAPTIVE VOLUME CONTROL

The HeartSave 7 detects the ambient volume and automatically adjusts the voice instructions.

### CPR FEEDBACK SYSTEM

Provides accurate feedback to the user on the quality of chest compressions.

### AVAILABILITY OF MODELS

Depending on preference, the HeartSave 7 is available as a semi-automatic or fully-automatic version.

### MULTILINGUALITY

The HeartSave 7 allows you to switch between up to four preset languages.

### 7 YEARS OF WARRANTY

The HeartSave 7 comes with a seven year warranty.
